CELEBRATING A DECADE OF EXCELLENCE: CGEC CELEBRATES 10TH FOUNDATION DAY

Cooch Behar Government Engineering College celebrated its 10th Foundation Day on 16th August, 2025, marking a significant milestone in its journey of academic and personal growth. Honouring a decade of success and looking ahead, a gathering of students, faculty, staff, and special guests celebrated a mix of reflection, gratitude, and achievement.

August 16th carried a significance unlike any ordinary day, stirring deep emotions among both students and faculty. The day provided the opportunity to walk down the memory lane. The campus radiated with energy as banners and decorations adorned every corridor, echoing the excitement and anticipation of everyone present. The programme on that day began with a warm welcome address delivered by the principal, who highlighted the humble beginnings of the college and its remarkable progress in academics, extracurricular achievements, and community service over the past decade. His words encouraged students to dream big while staying rooted in values. The respected Principal, along with other faculty members were felicitated. Their dedication and hard work have been instrumental in shaping the institution's culture and success. This was followed by the ceremonial lighting of the lamp, symbolizing knowledge and wisdom.

The highlight of the day was a cultural program that showcased the diverse talents of our students. The stage came alive with a variety of performances, including captivating classical dance performances, soulful musical renditions, and engaging recitations. The performances were not just entertaining but also reflective of the creative spirit that the college encourages. A blood donation camp was part of the celebration. The EUREKA, an entrepreneurship competition arranged by the "Nexovate" e-cell of the college, was also held on that day. The formal ceremony concluded with an awards presentation, recognizing students for their outstanding contributions throughout the year.

As CGEC steps into its second decade, the Foundation Day served as a reminder of how far the institution has come and how much promise lies ahead. The 10th Foundation Day celebration was more than just an event, it was a powerful recap of our college's journey, its values, and the strong community that has been built over the past decade. With renewed vision and commitment, the college community looks forward to achieving greater heights in the years to come.

CONNECTING VIRTUALLY: FIRST-YEARS GET A WARM DIGITAL WELCOME AT ONLINE INDUCTION

The transition from high school to college is a pivotal moment, and for the incoming First-Year students of 2025-2029 batch, that journey officially began with an interactive Induction Programme, from 15th to 19th October, 2025. Though held online, the event successfully introduced essential campus resources and induced a sense of community, all through screens.

The main objective of the Induction was to introduce students to the college's academic structure and campus details, and also the radiant extracurricular life. The event utilized Google Meet to host the interactive session.

The induction began with an address led by the respected Officer-in-Charge, Dr. Sushovan Chatterjee, who formally welcomed the batch and introduced them to the institution's vision, mission, and core values. Next came a detailed introduction to the engineering curriculum, the credit system, and the evaluation process. This was followed by inaugural performances. Integrated into the 5-days programme were presentations from various departments. Heads of Computer Science and Engineering, Mechanical Engineering, Civil Engineering, Electronics and Communication Engineering, and Electrical Engineering departments presented their visions, highlighted ongoing research, and introduced key faculty members. This helped to explain the specific fields of study associated with every department and showcased the opportunities within each. Furthermore, a portion of each day was dedicated to the introduction of various cultural and technical clubs and cells, ensuring students understood the vast co-curricular landscape available to them from the very start.

The switch to an online format presented some technical challenges, but the efforts of the administration, faculty, and student volunteers ensured a smooth and enriching experience. The 2025 induction was successfully wrapped up, with providing a solid foundation and equipping our first-year engineers with the confidence needed to embark on their exciting journey in technology and innovation.

CGEC HONOURING ACADEMIC EXCELLENCE

On 16th August 2025, Cooch Behar Government Engineering College celebrated its Foundation Day with great enthusiasm and pride. The program was graced by the esteemed presence of Principal-in-Charge, Dr. Shushovan Chatterjee, and Registrar-in-Charge, Dr. Kingshuk Dan, who jointly led the ceremony. One of the key highlights of the event was the felicitation of academic toppers from different years and departments, recognizing their dedication and excellence in academics.

From the 2nd Year, the toppers included Pritismay Halder (CSE), Anjali Kumari Sharma (ECE), Goutam Ghosh (EE), Santunu Saha (ME), and Yashasree Paul (CE). Representing the 3rd Year,

the awardees were Bidisha Mallick (CSE), Adripta Ghosh (ECE), Saswata Mukherjee (EE), Raju Biswas (ME), and Swarnali Talukdar (CE). From the 4th Year, the toppers were Arik Saha (CSE), Subhojit Ghorai (ECE), Ankan Prodhan (EE), Bikram Paul (ME), and Paban Chowhan (CE).

The felicitation aimed to motivate students to pursue academic excellence and uphold the values of hard work and perseverance. The dignitaries appreciated the efforts of the toppers and encouraged others to follow their example. The celebration concluded with a sense of inspiration and commitment among all students to contribute to the legacy of the institution.

VISWAKARMA PUJA AT CGEC

On 17th September 2025, CGEC celebrated Viswakarma Puja with vibrant colors, lights, and festive spirit, beautifully blending faith, culture, and togetherness. The campus came alive with stunning decorations created by Rongmilonti, the Art Club of CGEC, setting the perfect mood for the celebration. The day began with traditional rituals, as students, faculty, and staff gathered to offer prayers to Lord Viswakarma. After the puja, everyone enjoyed a hearty lunch at the college canteen, with both veg and non-veg options, making it a joyful moment of sharing and conversation.

In the evening, cultural performances of music and dance showcased the talent and energy of CGEC students. The celebrations concluded with an energetic DJ night, where tradition met youthful enthusiasm. Viswakarma Puja 2025 became a memorable experience of devotion, fun, and unity for the entire CGEC community.

INDEPENDENCE DAY CELEBRATION

On the glorious occasion of our nation's 79th Independence Day, the campus of Cooch Behar Government Engineering College was filled with patriotic fervor and enthusiasm. The celebration began with the arrival of our respected Principal, Dr. Shushovan Chatterjee, who was warmly welcomed by faculty members, staff, and students. In the presence of the gathering, Dr. Chatterjee, accompanied by the esteemed Registrar, Dr. Kingshuk Dan, proudly hoisted the National Flag. As the tricolor unfurled high in the sky, the entire crowd stood in unison to sing the national anthem, echoing the spirit of freedom and unity.

The event was marked by the participation of students who came forward to express their respect and admiration for the nation in creative ways. Among the highlights of the program was an innovative performance by Prithwiraj Sarkar, a 2nd year CSE student, who, along with his batchmates, showcased his patriotism through a remarkable drone show. What made this performance truly special was that the drone was entirely self-designed and self-built by Prithwiraj, symbolizing the essence of Aatmanirbhar Bharat (self-reliant India). The drone gracefully hovered in the sky, forming the tiranga and leaving the audience spellbound.

- Event Management:- Rupak Mahapatra(2nd year CE), Rajanna Das(2nd year ECE)
- Social Media & PR:- Rishav Prasad(2nd year CSE)

BLOOD DONATION DRIVE AT CGEC

The students of Coochbehar Government Engineering College have always shown strong commitment to social service. To mark the college's 10th Foundation Day, a blood donation camp was organized on 16th August in collaboration with St. John's Blood Bank. Students, faculty, and staff participated enthusiastically, supported by trained medical teams ensuring a safe and hygienic process. Volunteers guided donors through screening, donation, and post-care with care and efficiency. Many first-time donors proudly contributed. A total of 18 units of blood were collected. Certificates and a gratitude dinner were offered to donors, reflecting empathy, responsibility, and the true spirit of education today.

AWARENESS ON MENTAL HEALTH-TH WELL-BEING

On 16th September, our college organized a seminar on mental health awareness to address an important yet often overlooked aspect of student life. The event brought together students and faculty in an atmosphere of reflection, empathy, and understanding, emphasizing that mental health is as essential as physical well-being. The session was led by experienced mental health professionals and counsellors who shared valuable insights on emotional resilience and self-care. The seminar began by highlighting common challenges faced by students in academic environments, including stress, anxiety, academic pressure, and overwhelming expectations. The speakers explained how untreated mental health concerns can affect academic performance, personal relationships, and overall quality of life. Real-life experiences and testimonies were shared, which resonated deeply with the audience and encouraged openness. Students were invited to express their thoughts and experiences, making the session interactive and fostering a strong sense of connection and solidarity among participants. A major takeaway from the seminar was the importance of building a supportive and empathetic community. Counsellors emphasized that awareness must be paired with understanding and action. Students were encouraged to check in on friends, offer support, and help normalize conversations around mental health. Practical strategies such as stress management techniques, mindfulness practices, and maintaining a healthy balance between academic responsibilities and personal life were also discussed. The seminar further highlighted the availability of the college's counselling services and encouraged students to seek help without hesitation. The seminar concluded with a message of hope and collective responsibility, reinforcing the need to create a campus environment rooted in compassion, care, and mutual support.

CAPTURE CREW: RATHYATRA 2025 PHOTOGRAPHY CONTEST

The Capture Crew club added a unique artistic flavor to this year's Rathyatra celebrations by organizing the "Rathyatra 2025 Photography Contest." The event brought together students with a passion for photography and videography, giving them a platform to showcase their skills and creativity while capturing one of the most vibrant and spiritual festivals of our culture.

The contest invited participants to look beyond the surface of the festival and frame its essence through their lenses. With the colorful procession, the joy of devotees, and the aura of Lord Jagannath's divine presence, the event provided endless opportunities for storytelling through images and videos. Students came forward enthusiastically, each submission reflecting a unique perspective and a distinct artistic voice. What made the contest special was not just the technical finesse of the participants but also the emotions their work carried. From candid shots of the crowd to detailed captures of the chariots, every frame told a story of devotion, celebration, and cultural pride.

CAPTURED BY:-
Soumyajit Nayek(3rd year, CE)
The videography entries brought movement and rhythm to the festival, while the photographs froze powerful moments in time, reminding us of the timeless bond between tradition and modern creativity. After careful evaluation, the judges selected Soumyajit

Nayek, a second-year student from ECE, as the winner of the contest. His photograph stood out as a perfect blend of emotion, light, and artistry, with Lord Jagannath's divine presence captured in a way that resonated with everyone who saw it. The balance of technique and feeling in his work elevated it beyond a simple picture, making it a piece of art that will be remembered. The event was more than a competition—it was a celebration of perspective. Through their lenses, participants reminded us that festivals are not only rituals but also shared human experiences that deserve to be preserved and remembered. The Rathyatra 2025 Photography Contest became a bridge between culture and creativity, encouraging students to express devotion and artistry hand in hand. The Capture Crew club succeeded in creating an event that was engaging, meaningful, and inspiring. It reminded us that photography and videography are not just about capturing images, but about capturing feelings, stories, and traditions that live far beyond the moment.

“তর্ক-MANCHA”: DEBATE COMPETITION ON INDEPENDENCE DAY

On 15th August, Independence Day was marked in our college not only with celebration but also with reflection and dialogue. The Debate Club organized a special debate tournament titled “তর্ক-MANCHA”, creating a platform where voices met, ideas clashed, and perspectives were shared.

The topic chosen for the tournament was both timely and sensitive: “Caste Reservation in India: Social Justice or Reverse Discrimination Today.” This subject, rooted in the history and present reality of the nation, ensured that the debate was charged with depth, passion, and strong reasoning. Participants were divided into teams arguing either for or against the motion, making the contest balanced and dynamic. The team “For the Motion” made their stance clear: caste reservation continues to be an essential tool of social justice. They argued that centuries of inequality cannot be undone without affirmative steps and that reservation provides a necessary platform for equal opportunity. Their words echoed the call for inclusivity and fairness, reminding everyone that true independence also means dismantling social barriers. The opposing team, “Against the Motion”, challenged this view, questioning whether the system has now created new divides. They emphasized the need for merit-based opportunities and raised concerns about how reservation policies may, in some cases, perpetuate imbalance rather than resolve it. Their arguments were sharp and thought-provoking, demanding the audience to consider whether reform is necessary in today's context. As the debate unfolded, it was not just about winning or losing, but about understanding. Every statement carried weight, every rebuttal added nuance, and every perspective reminded us that issues of social justice are never simple. The audience was fully engaged, often caught between nodding in agreement and rethinking their own assumptions. After an intense contest of words, logic, and persuasion, the winners were announced. The team “For the Motion”—Arnab Bar, Rupak Mahapatra, and Trishan Banik—were declared victorious for their clear reasoning, strong presentation, and convincing rebuttals. Their performance stood out as an example of both preparation and passion.

“তর্ক-MANCHA” was more than a debate competition; it was a reminder of why discussions matter. On a day that celebrates freedom, it showed us that independence also means the right to question, to argue, and to think critically. The event closed with applause, pride, and the spirit of dialogue that will continue beyond the stage.

CAPTURE CREW HOSTS INDEPENDENCE DAY COMPETITION

The air on campus was buzzing with a mix of creative energy and patriotic fervour as the Capture Crew of CGEC successfully hosted its Independence Day Photography and Videography Competition on August 15. From the tricolour fluttering against a clear sky to candid moments of cultural pride, the entries reflected a rich tapestry of interpretations.

The competition was divided into two categories: photography and videography. In the photography category, Irfan Ahmed (3rd year, Civil Engineering Department) took first place with his stunning portrait series. For videography, the top position went to Sakhil

CAPTURED BY:-
Irfan Ahmed (3rd year, CE)

Hossain (3rd year, Mechanical Engineering

Department). The event not only celebrated creativity but also reminded everyone of the essence of independence and the responsibility it brings.

"LIGHT. LENS. LAUGHTER."! CAPTURE CREW HOLDS DAZZLING DIWALI PHOTOGRAPHY COMPETITION

Capture Crew, our college's photography club, hosted its much-anticipated Photography Competition on the occasion of Diwali. The competition saw an overwhelming response across all departments. The theme of the contest was "Festive Lights and Vibrant Nights". The competition's First Place went to Arkadeb Thokdar (1st Year, Mechanical). The Second Place was bagged by Sampriti Adhikari (2nd Year, ECE), while the Third Place went to Sarbajit Mondal (1st Year, CSE). The photography competition successfully brought our busy student community together and encouraged us to look at our surroundings with a more artistic eye.

NEXO VATE WELCOMES FRESHERS

Recently, Nexovate successfully hosted its highly entertaining Freshie Intro Session for the incoming first-year students. This year, the event was conducted seamlessly online, giving the new batch a fresh start and, more importantly, planting the seeds of innovation and entrepreneurship in their minds. The session's highlight was undoubtedly the students' spontaneous and witty answers to the questions asked. The session proved that the path to innovation doesn't always have to be paved with seriousness. Sometimes, the best way to break the ice and ignite enthusiasm is with a healthy dose of college-life realism and unfiltered sass. NEXO VATE freshie intro is online ! search NEXO VATE youtube channel

NEXO VATE SPARKS CAMPUS DIALOGUE ON NEC

Nexovate, the Entrepreneurship Cell of CGEC, recently energized the campus with a group discussion on the challenges faced by student entrepreneurs, focusing on practical and achievable solutions to strengthen innovation at CGEC.

A key issue discussed was the lack of mentorship. Students highlighted the difficulty of accessing experienced guidance. As a solution, a Mentorship Network Program was proposed, connecting students with alumni entrepreneurs, faculty, and local business leaders through platforms like LinkedIn and Google Forms, along with regular meetups and feedback sessions.

Funding and resources were another concern. To address this, a Micro-Grant & Resource Pool supported by alumni, NGOs, and local businesses was suggested, along with Startup Pitch Days to secure seed funding.

The discussion also emphasized the need for a formal, student-led E-Cell to organize entrepreneurial events. The session ended with optimism about transforming CGEC into a thriving startup ecosystem.

EUREKA – NATIONAL ENTREPRENEURSHIP COMPETITION, IIT BOMBAY

The spirit of innovation and entrepreneurship lit up the campus of Cooch Behar Government Engineering College (CGEC) as it hosted EUREKA, a prestigious entrepreneurship competition conducted under the banner of NEC IIT Bombay. The event was meticulously organized by Nexovate, the E-Cell of CGEC, under the able mentorship of Prof. Supriyo Banerjee, and brought together some of the most creative and business-minded students from diverse academic institutions.

The competition witnessed enthusiastic participation from students not only of the host college but also from reputed institutions such as Calcutta Institute of Engineering and Management, Alipurduar Government Engineering and Management College, and the University of North Bengal. Participants from varied branches of academia showcased their entrepreneurial zeal by pitching innovative business ideas aimed at addressing real-world problems while creating sustainable business opportunities.

The distinguished panel of judges added to the prestige of the event. The jury comprised Dr. Sourav Chakraborty, Assistant Professor, Department of ECE, CGEC, and Mr. Somnath Bhattacharyya, a renowned literary figure and respected social reformer. Their insightful evaluation, critical feedback, and encouraging remarks provided the participants with a valuable learning experience.

In his address, Dr. Chakraborty advised participants to “start small and grow fast,” emphasizing the importance of scalability and consistent execution in entrepreneurship. Mr. Bhattacharyya, on the other hand, urged students to collaborate with local businesses and grow alongside them.

He highlighted how community-based ventures not only strengthen local economies but also give startups a strong foundation to scale up. His suggestions provided a practical outlook that deeply resonated with the aspiring entrepreneurs.

The competition unfolded with high intensity, where each team presented their business model with conviction, creativity, and strategic clarity. In a nail-biting finish, Team HEARTMADES emerged as the ultimate winner. The team, consisting of Manish Dey (CGEC) and Dwip Majumdar (University of North Bengal), stole the spotlight with their brilliant idea of bridging the talent of local handicrafts with consumer markets. Their model not only focused on generating business but also emphasized empowering rural artisans by providing them with a broader marketplace for their skills.

Adding to the excitement, Tiki-Taka Sportszone and The Red Roots were declared the first and second runners-up, respectively. Both teams impressed the judges with their innovative perspectives and well-structured pitches, standing out in a competition that was fierce, diverse, and immensely inspiring.

EUREKA proved to be much more than just a competition—it was a celebration of innovation, vision, and entrepreneurship. The event gave young minds a platform to nurture their ideas, test

NEXO VATE, E-CELL OF CGEC, CONDUCTS WORKSHOPS TO PROMOTE ENTREPRENEURSHIP AWARENESS ACROSS COOCH BEHAR

On a major step toward strengthening the entrepreneurial ecosystem of North Bengal, Nexovate, the Entrepreneurship Cell of Cooch Behar Government Engineering College (CGEC), organized a series of workshops across three premier institutions—Cooch Behar Polytechnic, Uttar Banga Krishi Vishwavidyalaya (UBKV), and Mathabhanga Polytechnic. Conducted under the mentorship of Prof. Supriyo Banerjee, the initiative aimed to create awareness about the National Entrepreneurship Challenge (NEC) organized by IIT Bombay and to motivate students to participate in national-level entrepreneurship platforms.

The workshops provided students with a comprehensive understanding of NEC, a prestigious initiative that encourages colleges across India to build strong, self-sustaining Entrepreneurship Cells. Participants were introduced to the objectives of NEC, the learning opportunities it offers, and the benefits of participation, including mentorship, workshops, networking, and national recognition.

Student response across all three institutions was highly enthusiastic. At Cooch Behar Polytechnic, students explored ways to launch small-scale projects and convert ideas into reality with limited resources. UBKV students showed strong interest in agricultural innovation and agri-entrepreneurship, reflecting their academic focus. At Mathabhanga Polytechnic, discussions centered on technology-driven entrepreneurship and affordable solutions for rural and semi-urban markets.

The outreach was led by Arya Ghosh, Adripta Ghosh, Anupam Dutta, Swastik Bal, Anushka Roy (3rd year, ECE); Trishan Banik (2nd year, ECE); Pranoy Hazra (2nd year, CE); Adityava Gangopadhyay (2nd year, CSE); Yashasree Paul (2nd year, EE); Debojit Sarkar (2nd year, CSE); and Satyajit Roy (2nd year, CSE). The team handled institutional coordination, logistics, and student engagement, ensuring the success of each workshop. Their efforts reflected leadership, initiative, and collaboration—core entrepreneurial values.

Beyond NEC, students were also encouraged to participate in EUREKA, one of India's largest business model competitions organized by IIT Bombay. Nexovate highlighted how such platforms enable young innovators to present ideas nationally, receive industry mentorship, and access early-stage funding opportunities.

Prof. Supriyo Banerjee emphasized the importance of nurturing entrepreneurship in tier-2 and tier-3 cities, noting that entrepreneurship is about innovation, problem-solving, and resilience. The workshops also aligned with a broader mission to position Cooch Behar and surrounding regions as emerging entrepreneurial hubs by bridging gaps in exposure and opportunity.

Participants appreciated the initiative, with many expressing interest in forming entrepreneurial clubs and competing nationally. As Nexovate continues its mission, more outreach programs are expected, marking a significant milestone in promoting innovation, leadership, and inclusive growth across North Bengal.

NEXO VATE CGEC E-CELL HOSTS INNOVATIVE SOCIAL MEDIA CHALLENGE UNDER NEC

On 6th September 2025, Nexovate, the Entrepreneurship Cell of CGEC, organized a social media challenge under the National Entrepreneurship Challenge (NEC) by E-Cell IIT Bombay. Participants used three random words to create an AI-generated image of an innovative product and shared its story on Instagram. Students from various departments

showcased creativity, innovation, and storytelling through futuristic and sustainable ideas. After evaluation, Krishanu Mondal (2nd year, EE) secured first place, followed by Joydeep Mitra (3rd year, ME) and Ayan Roy (2nd year, CSE). The event highlighted Nexovate's commitment to fostering tech-driven entrepreneurship and creativity.

INNOVATING FOR A SMARTER INDIA: COLLEGE HOSTS INTERNAL HACKATHON

Coochbehar Government Engineering College is buzzing with energy as it steps into the spotlight as a launchpad for the Smart India Hackathon (SIH) 2025. In a crucial first step, the college hosted a successful internal hackathon competition, serving as the official qualifying round to select the most promising teams to represent our institution at the national level.

A hackathon is more than just a competition; it's a high-energy, marathon event where developers, designers, and innovators collaborate intensively to build a functional software or hardware prototype that addresses real-world problems. This internal event mirrored the intensity and spirit of its national counterpart, challenging our students to think on their feet and work through the clock.

Recognizing that every great creation needs a blueprint, the organizing committee first held a comprehensive pre-hackathon mentoring session. This session was a game-changer for many participants. The mentoring session was led by professor Supriyo Banerjee, the SPOC of our college, on 8th September via Google Meet. He shared insights on effective problem-solving, teamwork, and the importance of a clear project pitch. This session was a critical preparatory step, helping participants refine their ideas and better understand the judging criteria for SIH 2025.

The internal hackathon competition was held online via Google Meet on 10th September. Teams were tasked with developing innovative solutions to problem statements provided on the official SIH 2025 website. The atmosphere was electric, with students fuelled by pure adrenaline. The competition was a true test of strategic thinking and creativity, as teams worked to develop comprehensive plans for their proposed solutions.

The competition, divided into three panels, had a set of esteemed judges for each one. Panel 1 had Dr. Sourav Chakraborty, Assistant Professor of the ECE department of CGEC and Prof. Santanu Das from the Mechanical Engineering department of Kalyani Government Engineering College. The second panel had Prof. Deepjyoti Santra, Assistant Professor of the Electrical Engineering Department and Prof. Prabir Kr. Naskar, Assistant Professor of the CSE Department, both from CGEC and Prof. Somnath Saha from the Computer Science Department of Coochbehar College. The judges of panel 3 were Prof. Somen Mondal, HoD of CSE Department of CGEC and Dr. Sudip Kr. Adhikary from the CSE Department of KGECE. The judges rigorously evaluated each proposal based on criteria like innovation, feasibility, clarity, potential impact, and the quality of the presentation itself.

The 18 winning teams not only earned recognition but also secured their spot as the college's official nominees for the SIH 2025. This internal event has proven to be a vital stepping stone, providing our students with a platform to refine their skills and gain hands-on experience in presenting their ideas.

TECH-O-NICKS HOSTS A THRILLING PYTHON QUIZ CONTEST

Coochbehar Government Engineering College is buzzing with energy as it steps into the spotlight as a launchpad for the Smart India Hackathon (SIH) 2025. In a crucial first step, the college hosted a successful internal hackathon competition, serving as the official qualifying round to select the most promising teams to represent our institution at the national level.

A hackathon is more than just a competition; it's a high-energy, marathon event where developers, designers, and innovators collaborate intensively to build a functional software or hardware prototype that addresses real-world problems. This internal event mirrored the intensity and spirit of its national counterpart, challenging our students to think on their feet and work through the clock.

Recognizing that every great creation needs a blueprint, the organizing committee first held a comprehensive pre-hackathon mentoring session. This session was a game-changer for many participants. The mentoring session was led by professor Supriyo Banerjee, the SPOC of our college, on 8th September via Google Meet. He shared insights on effective problem-solving, teamwork, and the importance of a clear project pitch. This session was a critical preparatory step, helping participants refine their ideas and better understand the judging criteria for SIH 2025.

The internal hackathon competition was held online via Google Meet on 10th September. The competition was a true test of strategic thinking and creativity, as teams worked to develop comprehensive plans for their proposed solutions.

MASTERING PYTHON: A 6-DAY ONLINE WORKSHOP

The Tech-O-Nicks recently hosted a successful six-day online workshop on python from 22nd to 27th July, designed to equip students with a solid foundation in Python programming. Presented by the student instructors Parthiv Bania, Rishav Prasad, Anirudha Ghosh, Rajat Mandal and Utsav Pal, the event drew a huge number of eager participants, from complete beginners to those looking to refine their existing skills.

The workshop kicked off by focusing on the fundamentals, ensuring a solid base for all participants. The initial sessions were dedicated to understanding Python's syntax, its various data types, and the essential control structures that form the backbone of any program. Participants learned to write simple yet effective code, mastering if-else statements, for loops, and while loops. The interactive nature of the online sessions, which included live coding demos and immediate Q&A, made it easy for students to grasp these core principles and apply them in real-time. This foundational stage was crucial, as it set the stage for the more complex topics to come.

As the workshop progressed, the curriculum delved into the more intricate aspects of Python. Participants were introduced to a variety of advanced data structures such as lists, dictionaries, tuples, and sets. The instructor, a senior student with extensive programming experience, explained the unique properties of each structure and provided practical examples of how to use them to solve common programming challenges. Following this, the focus shifted to functions and object-oriented programming (OOP). Students learned to create reusable functions to modularize their code and were given a clear introduction to classes and objects.

This session was particularly transformative, as it moved the students from writing simple scripts to thinking in terms of building organized, scalable applications. The final two days were the highlight of the workshop, dedicated to putting theory into practice. The sessions moved beyond the basics to introduce participants to popular Python libraries used in data analysis and web development. Students got hands-on experience with tasks like file handling, data parsing, and building simple web applications. This practical component was a game-changer, as it showed students the immense power and versatility of Python in real-world scenarios. Feedback from attendees was overwhelmingly positive. Many appreciated the interactive format, noting that the balance between theory and practice helped build both understanding and confidence. The enthusiasm and creativity displayed were a clear reflection of how deeply the students had benefitted from the experience. The Code-A-Thon competition towards the end of the workshop gave students a platform to apply their skills to practical challenges, making the learning experience both rewarding and memorable. It took place on the final day, on 27th July. This finale was not just a celebration of their new skills but also a glimpse into the endless possibilities that Python offers, from data science to web development. In recognition of every learner's effort, Tech-O-Nicks will also present certificates of participation. The Python Mastery Workshop was not just about learning a programming language; it was about promoting a culture of coding curiosity and problem-solving. The online format ensured that students could participate from anywhere, making the workshop accessible to a broader audience. The success of this event reinforces Tech-O-Nicks' commitment to empowering students with valuable skills for their academic and professional careers. The club is already looking forward to hosting more such workshops in the future, aiming to cover other cutting-edge technologies and continue supporting the growth of our student community.

NEXOATE REACHES NEC 2025 FINALS, BRINGS NATIONAL RECOGNITION TO CGEC

Cooch Behar Government Engineering College (CGEC) has achieved a moment of pride as Team Nexovate, the college's entrepreneurship club, has secured a place in the Finals of the National Entrepreneurship Challenge (NEC) 2025, organized by the Entrepreneurship Cell, IIT Bombay.

Competing against over 700 teams from across the country, Team Nexovate emerged among the Top 70 teams nationwide, showcasing exceptional dedication, innovation, and entrepreneurial spirit. The journey to the finals involved months of rigorous brainstorming, strategic planning, teamwork, and consistent effort, reflecting the team's commitment to excellence.

Throughout the competition, participants gained valuable insights into leadership, collaboration, and transforming ideas into impactful solutions. Each challenge strengthened their skills and prepared them for the national stage.

VICTORY ON THE PITCH: THE INTER-DEPARTMENTAL FOOTBALL TOURNAMENT KICKS OFF!

The air crackled with excitement, and the thunderous cheers echoed across the campus on 8th and 9th November as our college successfully hosted the much-anticipated Inter-Departmental Football Tournament, with enthusiasm, unity, and an electric atmosphere that brought students together beyond classroom boundaries.

This event, a fantastic blend of fierce competition and camaraderie, once again proved to be the perfect platform for students to showcase their athletic prowess and department pride. Organized by the Sports Club of CGEC, the tournament saw five teams participating from each of the five departments of the college: Computer Science and Engineering, Electrical, Mechanical, Civil, Electronics & Communication—each team arriving on the field with weeks of preparation, renewed energy, and a drive to secure the prestigious championship title. Even first-year students took part eagerly. The enthusiasm was palpable throughout the college. What unfolded over two days was not just a series of matches, but a festival of unity, teamwork, and passion.

With the blowing of the ceremonial whistle, the tournament officially commenced, and the crowd erupted into applause. The stands were gradually filling with enthusiastic students cheering for their respective departments. Colorful banners added a festive touch to the entire atmosphere. Volunteers coordinated effectively, and the referee took his position. The tournament began with knockouts, giving each department a fair chance to exhibit their strengths

The tournament kicked off with a bang, with all teams vying for the coveted championship title. From the strategic defence of the Mechanical Engineers to the blazing speed of the CSE wing, every match was a testament to the diverse talents our college possesses. The initial phase saw some stunning upsets and nail-biting finishes. The knock-out matches were nothing short of dramatic. The first match between Mechanical Engineering and Computer Science and Engineering teams kicked off in front of an enormous crowd. Mechanical dominated ball possession, but CSE held firm with their impenetrable defence. The second match—Electrical Engineering vs Electronics and Communication Engineering—was equally gripping. EE showcased impeccable teamwork, maintaining possession and creating multiple scoring opportunities, while ECE’s goalkeeper delivered remarkable saves, delaying the inevitable. In the third game, The ME returned for their second knock-out match, this time against the Civil Engineering Department. The fourth match brought together CSE and ECE. The match was tense, with both sides displaying skilled strategy. The final match of that day, between EE and Civil, had enormous weight as CE still stood a chance to reach the semi-finals. The stands were packed throughout the matches, with students cheering on their respective departments. The sheer volume of the cheers and the inventive banners proved that departmental pride runs deep!

As it turned out, the Civil Engineering team was eliminated, and the rest of the teams qualified for the semi-finals. The next day began with fresh energy and renewed excitement as four departments prepared for the two all-important semi-final matches. Having faced each other earlier, both ECE and EE teams entered the first match with strong familiarity and heightened rivalry.

DAY 1: TUESDAY (8th Nov - 10PM)	
08.11.2025 ME vs CSE 9:00 AM	08.11.2025 ECE vs EE 10:00 AM
08.11.2025 CE vs ME 11:00 AM	08.11.2025 CSE vs EE 12:00 PM
08.11.2025 CSE vs ECE 2:00 PM	08.11.2025 EE vs CE 3:00 PM
DAY 2: WEDNESDAY (9th Nov - 6:00PM)	
SEMI-FINAL 1 08.11.2025 ECE vs EE 10:00 AM	
SEMI-FINAL 2 08.11.2025 CSE vs ME 10:00 AM	
FINAL 08.11.2025 TBD vs TBD 2:00 PM	

ECE dominated the midfield early on, creating multiple chances, but EE’s resolute defending and excellent goalkeeping kept them at bay. The second semi-final between CSE and ME was a strategic masterpiece, and the match saw CSE emerging victorious. The air on the final moment was exciting as the Electrical Engineering team faced off against the Computer Science and Engineering team. The match lived up to its hype as a true battle of offense versus defence.

The match was a true reflection of both departments' specialties: precision and speed. CSE relied on quick, aggressive attacks, while EE demonstrated methodical control over the midfield and clinical finishing.

After a hard-fought contest characterized by disciplined defence and sharp attacking moves from both sides, the Electrical Engineering team ultimately prevailed over CSE to be crowned this year's champions! The field erupted in celebrations as players from both sides displayed mutual respect. The Electrical Engineering team proudly lifted the championship trophy amidst loud applause. "This is one of the best comebacks I've ever seen in CGEC's football culture", said Bibek Mahata (4th year), the ex-incharge of the Sports Club of the college to our reporters. "It is not at all easy to win a match against a team like CSE", opined the captain of EE team, Koushik Bauri (4th year), "we want to congratulate CSE as well for the challenges they've made us face on ground, and we will forever remember this one match against them". More than just a competition, the tournament achieved its core objective: promoting unity and a healthy competitive spirit among students from different engineering disciplines. It was a refreshing break from the academic grind, reminding everyone of the importance of physical fitness and teamwork.

The Inter-Departmental Football Tournament 2025 was a resounding success, leaving a lasting impression on players and spectators alike. It highlighted the power of teamwork, the thrill of competition, and the joy of collective celebration. As the players walked off the field, tired but proud, and the crowds dispersed with smiles and stories, one thing was certain—the spirit of sportsmanship had won above all.

The tournament truly embodies the spirit of our college: teamwork, strategic thinking, and the pursuit of excellence—whether in the lab or on the field. It was a perfect reminder that sometimes, the best lessons—about leadership, teamwork, and resilience—are learned not in the classroom, but on the field.

AN OPEN HOUSE SESSION 2025 – “MEET THE ALUMNI”

The Open House Session 2025, titled “Meet the Alumni”, was successfully organized on 12th November 2025 at 10:00 PM through the Google Meet platform. The primary objective of the session was to bridge the gap between current students and alumni by providing firsthand insights into career development, higher education opportunities, and industry expectations.

The session was graced by the presence of five distinguished alumni who have established themselves in diverse professional domains. Mr. Suman Dutta (ME ’21) shared his journey from mechanical engineering to pursuing an MBA at IIM Trichy, highlighting his professional experiences at Infosys, Cognizant, and Nestlé. His talk emphasized the importance of adaptability and continuous learning. Ms. Swatilekha Roy (CSE ’22) spoke about her experience working with Microsoft, startups, and social-impact organizations, encouraging students to focus on practical skills and innovation.

ASSOCIATE - TRUST & SAFETY AT GENPACT INDIA PVT. LTD

Mr. Dipankar Ghar (ME ’23) discussed career prospects in the renewable energy sector, drawing from his role as a Wind Asset Manager at Adani Green Energy Ltd., and shared insights from his earlier tenure at L&T Ltd. Mr. Mahitosh Gorai (CE ’21) reflected on his transition from a technical role at TCS to pursuing an MBA at IIM Visakhapatnam, stressing the value of leadership and communication skills. Ms. Gargi Bandyopadhyay (ECE ’24) provided a unique perspective on corporate responsibility and online safety through her role as an Associate in Trust & Safety at Genpact India Pvt. Ltd.

The session concluded with an interactive question-and-answer segment, where students actively engaged with the speakers. Overall, the event was highly informative and inspiring, motivating students to plan their careers with clarity, confidence, and determination.

TEST YOUR BRAIN

QUESTIONS

- 🔥🕸🏢 – Friendly neighborhood hero swinging through skyscrapers
- 🧑🔬💻 – A tech visionary who started in a garage and changed personal computing forever
- 🎬🎵🇮🇳 – A filmmaker whose music feels like poetry and cinema feels like rhythm
- 🌐🇮🇳 – India’s eye in the sky, watching weather, borders, and beyond
- 🧙⚡ – A young wizard marked by destiny, raised in a cupboard
- 🏆🇮🇳 – Calm as ice, sharp as lightning, he led India to historic glory
- 🔌💡 – The branch that powers cities, lights homes, and drives automation—identify this engineering field
- 📱🍏 – A brand that blends design and innovation, bitten but brilliant
- 🌐🧠📊 – Trained on data, finds patterns, and improves decisions—what technology is this?
- 🦁🏆 – Roared on home soil and lifted the cup after decades of waiting

HIGHLIGHT

THE JOURNEY OF NEXOATE INTO NEC-2025

A moment of immense pride for Cooh Behar Government Engineering College! 🌟 The Entrepreneurship Cell (E-Cell) has achieved prestigious Finalist status at the **National Entrepreneurship Challenge (NEC)** hosted by **IIT Bombay**, securing a remarkable **All-India Rank 63** among hundreds of elite institutions nationwide. This significant milestone underscores our unwavering commitment to fostering a culture of innovation, visionary leadership, and a robust startup ecosystem within our campus. It serves as a testament to the relentless hard work and creativity of our students. We are dedicated to empowering the next generation of change-makers and industry leaders as we continue to push the boundaries of excellence. 🚀

"Meteor of Memories"

I miss you—
so much that even a meteor takes its
time
to fall through the silence of the
sky.
You might think that's a fleeting
moment...
but no—
even a second of falling can feel like
forever.

A meteor never knows its own
destiny.
Will it survive the pull of gravity,
or vanish into ash before touching
the earth?
Just like us—
we never knew whether our bond
would land safely, or burn mid-
journey.

We remember only the glow—
the laughter, the warmth,
the light we shared before the clash.
And when it's over,
we miss the brilliance that once
blinded us.

Meteors live short,
but they move fast—
like memories rushing through the
mind,
unpredictable, unstoppable.
One moment shining,
the next—
gone.

(Narrator is metaphor here)

THE RAYCHAUDHURI EQUATION

Everybody knows Stephen Hawking for the extraordinary singularity theorems he developed with Roger Penrose, but very few people know who laid the groundwork that influenced those ideas, it was Dr. Amal Kumar Roy Choudhury. Roy Choudhury

was an Indian theoretical physicist, best known for his work in relativity and cosmology, and honestly, one of the most underrated legends in Indian science. His greatest contribution is the Raychaudhuri

Equation, a cornerstone of General Relativity. This equation explains how matter and energy cause spacetime to curve and how geodesics (paths followed by particles and light) tend to converge. In simple terms, it showed why singularities, like black holes and the Big Bang, are not just mathematical accidents but inevitable under very general physical conditions. This single equation became the backbone for the Hawking-Penrose singularity theorems. Stephen Hawking himself openly acknowledged Roy Choudhury's influence, which tells you how deep and fundamental his work really was
